

It's
your
water.

woder[®]
the water company [™]

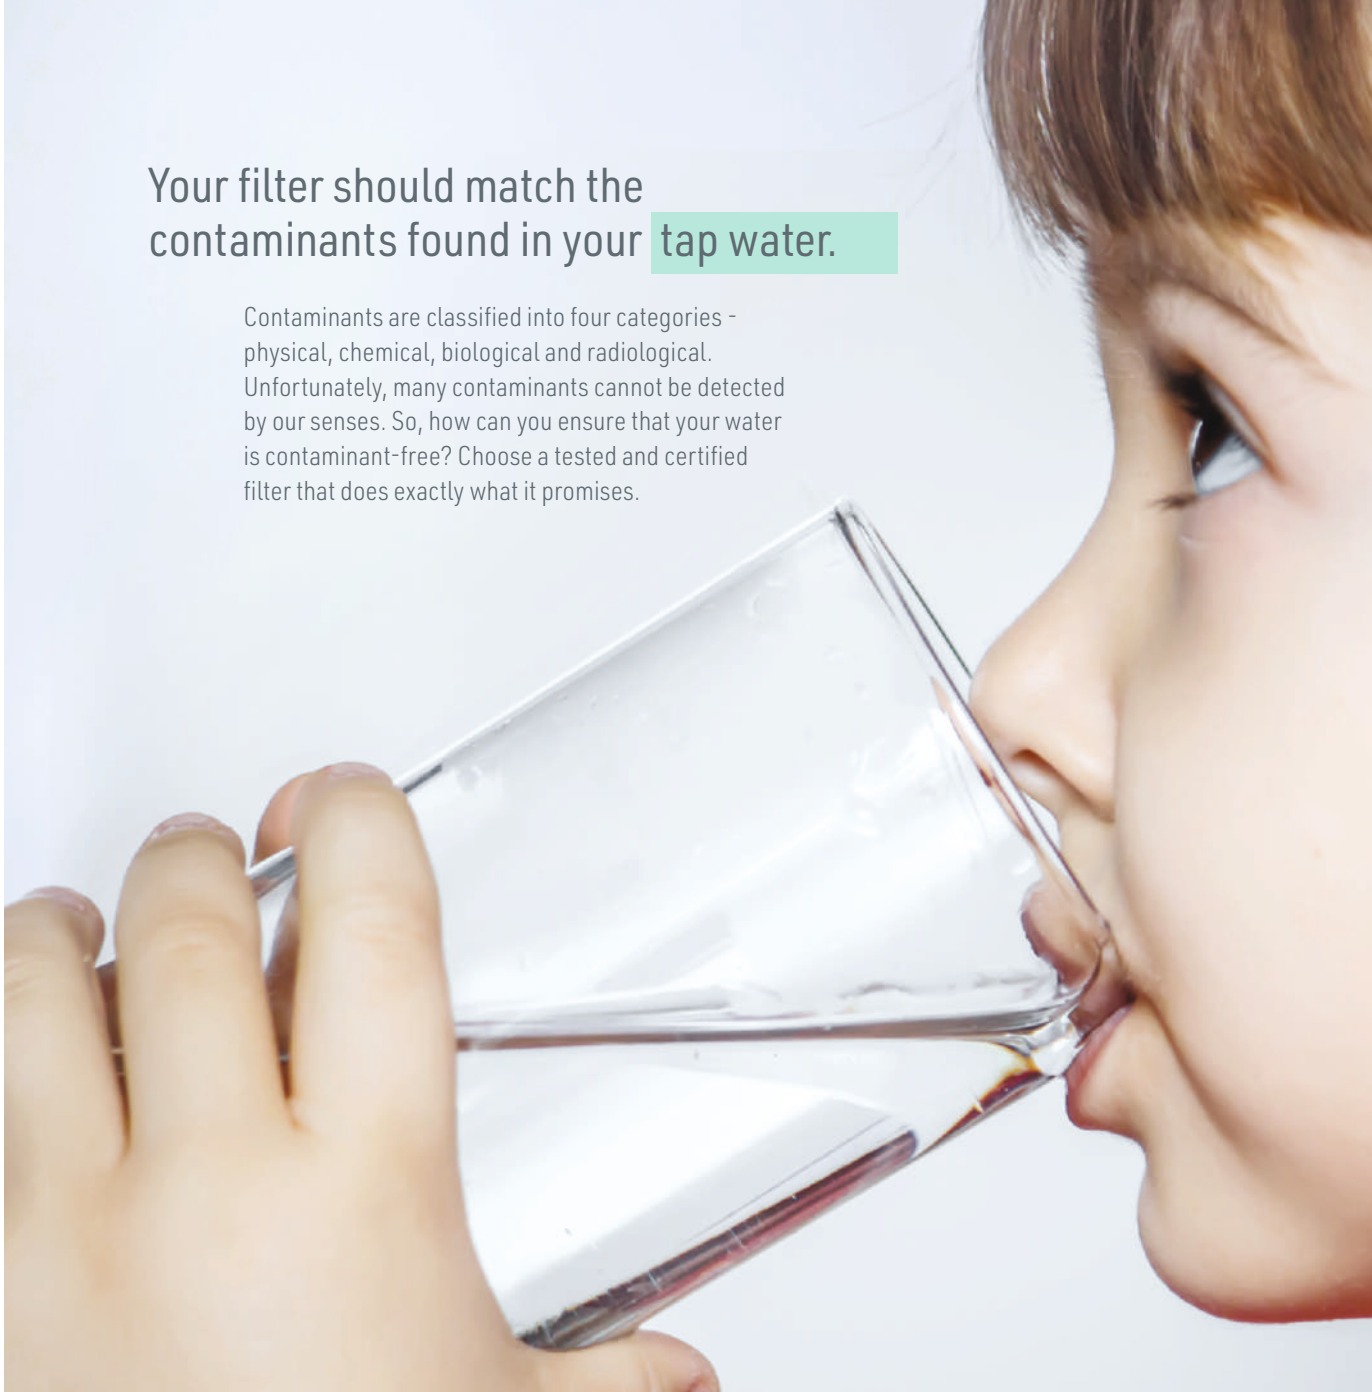

You
should
know

where it comes from
and ***what's in it.***

Your filter should match the contaminants found in your tap water.

Contaminants are classified into four categories - physical, chemical, biological and radiological. Unfortunately, many contaminants cannot be detected by our senses. So, how can you ensure that your water is contaminant-free? Choose a tested and certified filter that does exactly what it promises.

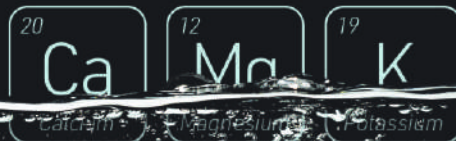

Remember... it's *your* water.

Have confidence it's being filtered properly.

***Selective Filtration™
is our advantage.***

Our Selective Filtration technology removes 99.9% of contaminants present in municipally treated water, while maintaining essential minerals that are vital to your health, like calcium, potassium and magnesium. The results are pure and *healthier* water from your tap

THIS

could be found in your tap water:

ALUMINUM

AMMONIA

ARSENIC

BARIUM

CADMIUM

CHLORAMINE

CHROMIUM

COPPER

FLUORIDE

BACTERIA & VIRUSES

LEAD

NITRATES/NITRITES

MERCURY

PERCHLORATE

RADIUM

SELENIUM

SILVER

URANIUM

Should I test my water with a TDS meter?

Healthy water has a certain level of total dissolved solids. Essential minerals are also considered TDS, therefore TDS levels are not an effective way to measure water quality. In fact, water with a low TDS count is considered "dead" water and not healthy for drinking. (Reverse osmosis systems usually produce zero TDS.)

A better filter with a better mission.

CARTRIDGESELECTION

ADVANCED

Premium ultra capacity water filter.

With Woder's Selective Filtration Technology you will have confidence that your water is pure. Our filters are designed to fit under sinks, refrigerators, ice machines, drinking fountains and bottle filler stations - for residential and commercial use.

Ensuring clean water for up to one year, before a replacement cartridge is needed.

*This is
important!*

WQA Gold Seal Certification means that our Advanced water filter has been rigorously tested to meet the highest of industry standards for quality, reliability and safety.

Safe, long-lasting and affordable point-of-use water filtration systems for your home, office, school, etc.

ADVANCED Combo

Water supplies with elevated levels of heavy metals, require specific filtration that is formulated to remove excess contaminants. Our ADVANCED Combo filter combines our 'Advanced' formula with additional heavy metal removal media, for areas where a higher concentration of heavy metal levels exceed the EPA's guidelines.

HEAVYMETAL

Heavy metals are present in all water supplies. We have formulated our HEAVYMETAL (HM) removal cartridge, specifically for communities and households with water that has been tested and found to contain *extremely high levels* of heavy metals, exceeding the EPA's guidelines.

SEDIMENT

Sedimentation in your water supply can contribute to water line and appliance damage and can carry absorbed chemical and microbial contaminants. Our SEDIMENT removal filter can help defend your home from such problems.

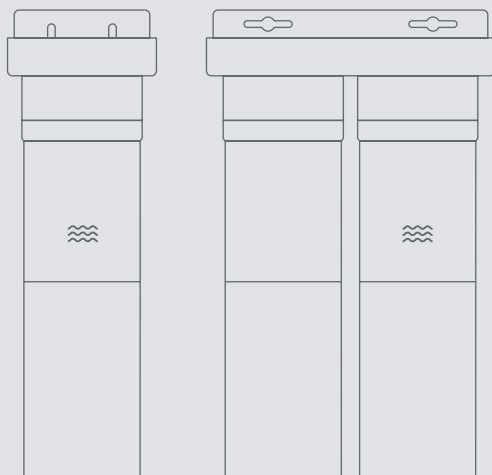

FLUORIDE

Municipally treated water supplies that exceed the Maximum Contaminant Level (MCL) of Fluoride, have shown potential to contribute toward adverse health effects. Our Fluoride removal filter lowers MCL levels almost entirely.

Water filter systems tailored to *your* water.

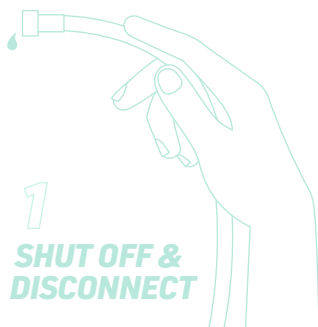

Different municipal water supplies contain different levels and types of contaminants. This is why we have developed our single and dual-stage water filter systems. No matter your water content, we have a water filter system to ensure your tap water is pure.

When utilizing a dual-stage system, the ADVANCED filter should always be the second and final stage of the system cycle, located on the right. This staging sequence ensures optimum filtration capabilities, efficiency and taste.

We've made
installation
a breeze.

We're proud to say that many of our best customers
are grandmothers who install their own filters!

Learn how easy it can be.

woder.com/install

Our mission is all about *your* water.

Water is essential to life and we believe access to cleaner water should be made more available to everyone, no matter where you live, or your social status. This is why we would like you to take a moment to consider the water you drink and use daily and understand one fundamental truth - it's *your* water®.

With your help, we can continue to empower more people to take back control of their water and make it as pure and natural as spring water. All the while gaining additional health benefits, reducing water costs and improving our environment, by keeping plastic water bottles out of landfills and the ocean.

Designed in Israel  *Made in the USA*
